

## MAGOTHY RIVER ASSOCIATION MAGOTHY CLEARWATER 2018

With your membership, **MAGOTHY CLEARWATER** will provide regular monitoring of the microbial water quality at your waterfront recreational area. Dr. Tammy Domanski, Professor at Anne Arundel Community College, coordinates this program. We monitor fecal enterococci, a group of bacteria associated with the waste of birds and mammals.

Samples will be collected on Wednesdays between 0800 and 1200 from land at your waterfront facilities. Please let us know the **exact location** (using map grids to locate) to sample. Results are posted at <http://ola2.aacc.edu/tldomanski> on Thursday afternoons and your rep will receive an email notification that results are posted.

There will be two testing schedules this summer:

1. 14-week **weekly** schedule, costing \$378, May 23 through August 22\*
2. 7-week **biweekly** schedule, costing \$189, May 23 through August 22\*

\*During 4<sup>th</sup> of July week, samples will be collected on Monday, July 2<sup>nd</sup> to provide data to communities before the holiday.

These prices are based on \$27/sample, which just covers the cost of testing. Please enclose the application below and include a check payable to **AACC Environmental Center** and mail it to the AACC Environmental Center, 101 College Parkway, Arnold MD 21012 BY May 1, 2018. Tammy can be reached at 443 994-9236 at [tldomanski@aacc.edu](mailto:tldomanski@aacc.edu).

Once you send in your form, you will receive email verification of receipt within 2 weeks. If you do not receive email verification by May 20, please email or call Tammy at the contact information above to ensure that your form has been processed and your community is on the schedule.

We also offer the optional service of having data reported to the Waterkeeper Swim Guide. This service provides a mobile app at which users can view data on mobile devices.

<https://www.theswimguide.org/guide/affiliates/> Please indicate on your form if you would like your weekly data submitted to the Swim Guide. Thank you.

### 2018 APPLICATION, MAGOTHY CLEARWATER

Community \_\_\_\_\_ Designated Rep \_\_\_\_\_

Sampling location: (For the precise location of your sampling site, provide a sketch or description on the back of this form, or include a print out from google maps showing the location, or you can provide coordinates).
